

Your Partner in Electronics Assembly

Unequaled experience in the manufacture of high quality electronic products over the decades gives BPC Electronics the edge in all aspects of contract manufacturing.

- SMT / LEADED ASSEMBLY
- PROTOTYPING - IN HOUSE FROM BOARD TO BOX
- WIRING AND CABLE HARNESES
- COMPLETE ASSEMBLY
- PURCHASING AND MATERIALS MANAGEMENT
- CONFORMAL COATING
- PRODUCT TESTING

To help keep material costs down, we are able to purchase parts from many different suppliers, large to small. From newly released parts to components only found on the obsolete market, we can find them all. We are often able to extend the life of older assemblies or produce repair parts for many years with our purchasing knowledge and worldwide contacts.

Assembly Services

BPC Electronics offers turnkey electronic manufacturing services for the medical, industrial control, audio-visual and many other industries with high reliability requirements.

Certified to international production standards, our rapid turnaround PCB assembly and comprehensive box build services cover all phases of the production cycle, from design and manufacturing through to distribution. The company provides OEM's and design engineers with a responsive, fully capable manufacturing partner who enables efficient high quality production on near impossible deadlines.

BPC simplifies production. We are a one stop manufacturing partner that can handle design, part production, assembly, casing fabrication and distribution. With our vertically integrated manufacturing approach, production lead time is dramatically accelerated.

Final Assembly & Box Build

In addition to our range of design and assembly services, BPC Electronics also provide complete box build solutions including materials management of all components, electromechanical parts, plastics, casings and print and packaging materials.

Complex and simple cable assemblies, wiring looms and full cabinet wiring can also be accommodated and fully integrated into the final product assembly process.
